**Subject:** Building Committee Update Opportunity

Dear Church Family,

On August 22nd the Building Committee made a brief update presentation following the morning service. The Site Plan that had been developed over the last year was described along with financing possibilities. We have been working since then on detailed designs for a new Fellowship Hall. You can follow our progress through documents posted under the "Building Committee Update" tile on the church website. (Click [here](#) to bring up that page.)

Our objective is to get final costs in the next month or so. Currently, there is a civil engineering plan that has been filed with the county for their permit process. Recently, we have worked out a layout for the new building. Before we move ahead with costing out that design, we'd like you to take a look at it and get your input.

This Sunday at 10:30 (immediately after Sunday School) and also immediately after the morning worship service, the plans will be available for viewing at the front of the church on the side opposite the piano. Members of the Building Committee will be there to summarize, explain, and answer any questions. We encourage you to take advantage of one of these opportunities to see these plans up-close and to share your thoughts with the committee.

May God bless our efforts to provide greater opportunities for fellowship!

On behalf of the Building Committee,  
-Phil Montgomery
